

Attn: Greenfield Planning Commission

March 9th, 2025

My name is Lauren Brittan. I am writing to refresh my previous letter from February 2nd (included in this packet) as there is a new CUP application before the Planning commission. In addition to my previous statements I submit the following.

My husband Eric and I purchased our land in December 2014 and built our home and moved to Greenfield in 2015. We moved here looking forward to a place where we could enjoy the additional space, quiet away from the city, and eventually a place to raise our family. The gravel pit has changed our ability to enjoy our property.

I live close to the dead-end of Greenfield road, over a half mile away from the gravel pit, and can hear the noise from activity, but especially that of the crusher. We can hear crushing, but also many of the overall operations of the gravel pit. That is unacceptable when we live over a half mile away.

We aren't bothered by dust at this distance like others have shared. However, my Aunt and Uncle happen to live across the river in Hanover from the new proposed expansion. Please maximize the setbacks for processing activity from single family homes.

I remain very concerned about the increased truck traffic from this operation. It seems the CUP does very little to address the lack of care taken by the gravel pit in this regard. When the pit is operating I do not feel safe walking on Greenfield road where these large trucks are. I will be sharing via video just one example of a haul truck completely over the center line, driving irresponsibly.

Thank you for listening to my concerns. Based on the above I respectfully request the following:

- Noise
 - Don't allow any operations on Saturday
 - Limit hours to 7am-5pm M-Thursday, 7am-5pm Friday
 - Limit how long the crusher can be used for mining activities – no more than 3 weeks
 - Enforce noise standards
- Dust
 - Keep dust and debris off Greenfield road, especially near the haul road
 - Water frequently to keep daily dust down
- Traffic
 - Require penalties for traffic violations and stricter enforcement
 - Limit speed on Greenfield road further (Currently 45mph)
 - Cap number of daily trucks
 - Require Gravel pit to help w/road maintenance
 - Install walking sidewalk from Harff to Cty Rd 10 on Greenfield road

Thanks,

Lauren Brittan
